As of AutoCAD 2010 Release 12, the API is no longer officially supported, and is included with AutoCAD 2012 (The.NET API is not included with AutoCAD 2012). As of Autodesk 2019, the API is no longer supported and is removed from Autodesk 2019 which is now made by Autodesk All-in-One Platform. History The first programming language for Autodesk was a Visual LISP system, known as the Lisp System of Autodesk, used from 1982 to 1991. From 1994, Autodesk used Microsoft's Visual Basic for Applications (VBA) language. However, a few years later, the Microsoft product line was perceived as being incompatible with the design process for AutoCAD. In 1998, with the release of AutoCAD 2000, Autodesk introduced the now-famous.NET API. In 1999, Autodesk acquired Softimage for $50 million. In 2005, Autodesk bought SolidWorks for $260 million. This acquisition resulted in the discontinued development of the VBA API in SolidWorks, and, with the discontinuation of Visual LISP for AutoCAD, a lack of C++ programming tools for AutoCAD. With the discontinuation of VBA for AutoCAD in 2008, a new API, ObjectARX was introduced. This API is still supported with all current releases of AutoCAD. In 2013, Autodesk purchased e-onsoft for $190 million. e-onsoft's ObjectARX API is still supported. In 2014, Autodesk acquired aQuantive. This move resulted in the discontinuation of AutoCAD as a standalone app and the creation of a unified AutoCAD platform under the aQuantive brand. e-onsoft's ObjectARX API is still supported and is built into the aQuantive brand of AutoCAD. In 2016, Autodesk acquired e-onsoft. This move resulted in the discontinuation of e-onsoft's ObjectARX API. , Autodesk replaced ObjectARX with a new OpenXR API. Features AutoCAD includes many features, such as: Support for running 3D models and meshes. Support for import and export of various file formats, including: DWG, DXF, DGN, DWT, GH4, IFC a1d647c40b

Open the Autocad application and launch Autocad Design. This was an extract of the original post in Autocad World Forum: Please also refer to this page for other Autocad options: A: I have the 2009 version, and you can download/activate it here: As @Mr_Mike mentioned, the online activation is getting phased out, so there is now a whole new process: Register for a web account at autodesk.com Download and install the software (free) Register for a key Download the key from the Autodesk website Run the download and keygen installer and follow the instructions Activate the key (the download link in step 3 will allow you to do that) It's a much better experience, and you don't have to manually save your license each time you use the software. When you activate the key, there will be a license file generated, which you need to install in the same manner as if you were using the online activation. This page has all the information you need: Note that you can only use the free versions of Autocad - the 2009 version (the one that I have) won't run on earlier versions of Windows, and the 2010 version only runs on Windows 7 and later.
